

Fall Arrester Blocfor™ 6 ESD

Product information

The Blocfor™ 6 ESD self-retracting lifeline is particularly well suited for all types of vertical and horizontal movement. It makes it easy to move horizontally on congested surfaces such as flat roofs or industrial sites.

Features:

- M10 connector to attach the fall arrest system to the anchor point.
- M47 chest connector to attach the fall arrest system to the harness: avoids an unsafe positioning on the point of attachment of the harness.
- 18mm strap: Length 6 meters.
- ESD absorption system: provides the user with an impact of less than 600daN even if the fall occurs when the strap is completely unwound.
- Fiberglass filled casing for added durability: UV, shock and aging resistant.
- Complies with CNB / P / 11.062 for use above 100 kg.
- Complies with CNB / P / 11.060 for horizontal use.

Material: Case: Polyamide / ABS blend, Pawl/Toothed Brake Wheel: Aluminium Bronze

Marking: According to standard

Standard: EN 360
