EVOLUTION TK17

Product information

The performance of cranes in the construction industry is constantly improving. Therefore, the most important features of the operatinghigh performance steel wire rope from TEUFELBERGER are higher flexibility, increased efficiency in general and utmost reliability.

Benefits of **EVOLUTION TK17**:

- Perfect spooling behavior in multilayer spooling use due to exact diameter tolerances and high dimensional stability under lateral pressure, even under enormously demanding conditions
- Easy installation and perfect handling features on reeving due to the rope's very high flexibility
- Safe and trouble-free operation and handling due to perfect torsional behavior even with heavy loads and enormous lifting heights
- Excellent service life due to high wear resistance in multilayer spooling applications due to the advanced compacted surface and enormous dimensional stability under lateral pressure
- fitted with the correct end-termination from Teufelberger this rope gives you trouble free operation
