Screw clamps for lifting in different positions

Product information

The screw lifting clamp is a versatile lifting clamp designed for the safe lifting and handling of steel plates and irregularly shaped steel components. The screw clamping mechanism ensures a secure grip on the load before lifting, allowing the clamp to be used in various lifting positions. It is ideal for lifting applications in industrial environments, machine shops, steel fabrication, as well as maintenance and servicing where irregularly shaped steel components are handled.

Especially suitable for

- Lifting and handling steel plates
- Handling irregularly shaped steel components
- Lifting applications in industrial facilities and machine shops
- Service and maintenance work

Product features

- Screw clamping mechanism provides a secure grip before lifting
- Suitable for lifting in various positions
