

Spreader 6650-TL ALU / adjustable

Product information

The spreaders have a high point of oscillation which results in good balance. Adjustable to adapt to goods with different lengths between the connection points and a compact size for transport. Each spreader is delivered complete with 2-leg sling (wire rope, chain och synthetic) and shackles. The spreader can be equipped with other accessories such as hooks on request.

Design: Welded aluminum construction that provides low weight.

Proof: 2 x WLL according to EN 131 55.

Marking: CE-marked, according to Machinery Directive 2006/42/EG

Finish: Details of steel are galvanized otherwise no surface treatment
