

Crane Lift Basket BK-500 / BK-1000 / BK-1000E (Emergency)

Product information

Man riding baskets can be used quickly and safely for temporary working at heights. Our man riding baskets are designed to be hung from a crane hook.

If the basket is exposed to corrosive environment, we recommend additional treatment according to Offshore coating system.

Storage: For increased longevity, we recommend that the basket is stored in-doors in a dry environment.”

Design: Welded frame in hollow beam with the bottom and sides covered in expanded-metal mesh. Personal items of safety equipment can be attached to the inside handrail. The basket is supported underneath for easy handling by truck or forklift. A gate is provided on one of the short sides (see the respective model). The basket is supplied complete with a four leg wire rope sling and a masterlink type MLA.

BK-500: Supplied with inward-opening latching gate.

BK-1000: Supplied with inward-opening latching gate.

BK-1000E (Emergency): Identical to the BK-500 / BK-1000 above except that in an emergency the entire end gate can be opened outwards to provide access, eg, for a stretcher and medical equipment to be taken on board.

Material: Hollow-beam and plate of high-strength structural steel.

Marking: Sign according to standard for inspection mark.

Finish: Yellow protective painting, RAL 1003, corrosivity class C3 (indoor storage), other painting programs are quoted upon request.

Part code	Code	WLL ton	Basket weight kg	Max. number of persons	A,	B,	E,	H,	L	Weight kg
