

Open-Flange Seals, Signode

Product information

Signode 117 HDG OF Open-Flange seals are specifically designed for use with a N-1444-5LSH pneumatic sealer on 32mm Magnus steel strapping. Open-Flange seals are the heavy duty version of Snap-On seals. These seals are placed over the overlapping strap ends either before or after tensioning the strapping, eliminating pre-threading and increase productivity.

Seal Type: Open Flange
Joint Type: Double Crimp

Material: Steel
Marking: Logo of supplier
