# Wire Rope U-Bolt Clip Powertex PC316

**Product information**

U-bolt wire rope clips are mechanical fasteners used to secure the ends of wire ropes or cables. They consist of a U-shaped bolt, a saddle, and two nuts. These clips are particularly useful for:

**Securing Wire Ropes:** They are used to create loops at the ends of wire ropes, which can be attached to hooks, shackles, or other anchor points.

**Temporary Anchor Points:** They are ideal for temporary installations where wire ropes need to be fastened and released quickly.

**Repairs:** They can be used to repair or splice wire ropes by securing two ends together.

**Construction and Engineering:** Commonly used in the construction and engineering industries to secure lifting equipment and rigging.

**Marine Applications:** Often used in marine environments to secure ropes and rigging on boats and ships.

These clips are easy to install and provide a reliable method for securing wire ropes in various applications.
