Protection Extreema® EP-XL & XXL

Product information

According to the EN-1492 regulations for safe use of roundslings the sling should always be protected on the anchoring point (shackles, pins, axis, trunnions, etc.) as well as the lifting appliance. The main application for our EP-series is the protection of lifting equipment and the object that will be lifted for a safer lifting operation.

With Extreema® protection roundslings and webbing slings have a significant longer life span and they will make your working conditions a lot safer.

Extreema® EP-XL & XXL sizes are the perfect solution to protect your sling in contact with sharp edges. Can be delivered in various dimensions. The color is white.

Extreema® EP-XL & XXL sizes have the highest abrasion resistance of any fiber, excellent dynamic toughness, flex fatigue resistance and very low elongation. The protection has superior cut, puncture and tear resistance.

EP-XL: 3 mm thick (Flexible protection)

EP-XXL: 6 mm thick (Double thickness for repetitive lifts and extremely sharp edges)

Also available as EP-L with velcro

Features Extreema® EP-XL & XXL protection:

- High cut resistance
- High tear resistance
- High abrasion resistance
- Good resistance to chemicals
- Does not take up water
