Corner Protector Extreema®

Product information

The Extreema® Corner Protector is an essential accessory for repetitive lifting operations involving payloads with sharp or abrasive edges. Specifically engineered to safeguard your equipment, it is crafted from HMPE or Dyneema®, This ensures maximum durability and a significantly longer lifespan for your round slings and lifting gear, even in the most demanding industrial environments.

Designed for flexibility and ease of use, the Extreema® Corner Protector features two integrated Velcro® straps that allow quick and secure attachment to the sling. This user-friendly design enables fast installation and repositioning, ideal for dynamic work environments where efficiency matters.

By integrating the Extreema® Corner Protector into your lifting operations, you minimize sling wear, reduce the risk of equipment damage, and significantly lower the need for maintenance or replacement. It’s a smart investment in safety, longevity, and operational efficiency.

When to choose this product

Best for:

- Lifting loads with sharp edges or rough surfaces
- Repetitive operations where sling wear is a concern

Product benefits:

- Extreme abrasion, cut, puncture, and tear resistance
- High dynamic toughness and flex fatigue resistance
- Exceptional flexibility for use on various angles and surfaces
- Equipped with secure Velcro® straps for fast attachment
- Lightweight and easy to install or remove
- Significantly extends the service life of lifting slings
