Electric wire hoist for lifting and pulling 230 V / 50 Hz

Product information

The 230 V electric wire rope hoist is a lightweight and easy-to-use solution for lifting and pulling loads in a wide range of applications. Its compact design makes it ideal for workshops, production facilities, warehouses, as well as installation and maintenance work. The hoist can be operated either with the control switch on the unit or with the supplied wireless remote control, ensuring convenient and safe operation. Equipped with a swivel hook and an overload indicator.

Especially suitable for

- Construction and installation work
- Service and maintenance tasks
- Warehouses and production facilities
- Lifting and pulling applications in various working environments

Effective wire rope lengths

- **VANOS250**: 6.8 m
- **VANOS450**: 3.4 m

Product features

- Hoisting speed: 5 m/min
- Wireless remote control with an operating range of 8 m (line of sight)
- Suitable for both lifting and pulling applications
- Lightweight and easy to use
- Can be operated using either the control switch on the unit or the wireless remote control
- Supplied with a wireless remote control
- Equipped with a swivel hook
- Overload indicator enhances operational safety
