Vertical Lifting Clamp IPU10

Product information

The Crosby IPU10 vertical lifting clamp is designed for lifting, turning and transferring steel plates, sheets and fabricated components. It enables loads to be moved between horizontal and vertical positions through a full 180° turning range. The hinged hoisting eye accommodates lifting from different directions without side-loading the clamp.

Best used for:

- Vertical lifting, positioning and turning of steel plates and fabricated components.
- Handling materials with surface hardness up to 363 HV10 (345 HB).

Product benefits:

- Hinged hoisting eye accommodates different lifting directions and multi-leg sling configurations.
- Lock-open and lock-closed mechanism supports controlled attachment and release.
- Welded alloy steel body combines strength with compact dimensions.
- Individually proof tested to twice the WLL, with certification supplied.
- Individual serial number and included test certificate support inspection and traceability.
